

1. Give an example of an algebraic expression that is a trinomial.
2. In your answer to #1, what are the variables?
3. In your answer to #1, what are the constants?
4. In your answer to #1, what are the operations?
5. Solve: $5 + \frac{9+5}{3+4} =$
6. Solve: $7 + (8 - 2) * 2 =$
7. Simplify as much as possible: $21 - 14x + 7y + 8 + 3y - 2x =$
8. Simplify as much as possible: $4x(2x + 3x) + 5y(5y + 3y) =$
